TECHNICAL. SKILLS. WORK.

Interested in a career in manufacturing, digital, health, construction, engineering or another STEM-based subject?

Institutes of Technology (IoTs) offer education and training designed and delivered with local and national employers. There are 12 IoTs already open across the country, with nine more coming soon – each made up of partnerships between local colleges, universities and employers – delivering the very best in higher technical education.

“
I would recommend studying at an Institute of Technology to anybody. Every day is now a learning experience.”

Paul Wilson, HNC in Construction, North East IoT

Find your passion

Learn in small groups with specialist lecturers, and develop in-demand skills focused on what you're most interested in. Get the career you want, built around your passions and interests.

Tackle real-world challenges

Courses are designed and delivered with employers. Through placements and masterclasses led by industry experts, you'll gain hands on experience and the work-ready skills you need to pursue a rewarding career.

Gain accredited qualifications

You'll train on industry-standard equipment and learn how to use the latest technology while gaining qualifications in sectors such as aerospace, cyber security, health, science and agritech.

Take your first step on an exciting path.
